SENECA · AI-FIRST COMMUNICATION

Tell it who. It decides what.

Seneca turns Claude from a file-maker into a communications lead. Tell it who you're talking to and what's at stake. It decides what to make, then builds it: decks, PDFs, graphics, GIFs, and interactive guides, in one consistent design anyone can open.

1

It chooses the format

Seneca starts from the audience and the moment, writes the message once, and picks the fewest formats where each one has a job.

"Exec review Thursday" → a deck plus a one-page pre-read. "CRM rollout to 40 reps" → a practice guide, a walkthrough GIF, and a cheat sheet.

2

Formats Office can't be

Click-through software guides that coach each step, seamless looping GIFs, graphics at exact platform sizes with safe-zone checks, and PDFs on custom stationery.

Examples of each are in the GitHub repo.

3

Built for AI, owned by you

Everything is HTML, CSS, and JavaScript rendered by a real browser engine, so you get exact type, layout, and motion. It's MIT-licensed plain-text skills you can fork, review, and brand.

The deck from today's meeting is a single HTML file made with Seneca.

Seneca and Claude Cowork

	COWORK'S BUILT-IN FILE SKILLS	SENECA
Starts from	The file you name	Who it's for and what's at stake
Makes	Word, PowerPoint, Excel, PDF	HTML decks, designed PDFs, graphics, GIFs, interactive guides
Across pieces	Each file built to its own request	One message and one design across the package
Motion and practice	What Office formats support	Looping animation and click-through practice
Editing afterwards	Open and edit in Office	Ask Claude, or edit the plain HTML
Ownership	Built in, maintained by Anthropic	MIT-licensed. Fork it and add your brand.

Based on Cowork's documented built-in skills, October 2026. They're complementary: use Cowork's Office skills when someone needs to edit in PowerPoint or Excel, and Seneca when the message has to land. Cowork installs plugins from GitHub.

Getting started

Install as a plugin in Claude Code:

```
/plugin marketplace add
https://github.com/htank898/Seneca.git
```

```
/plugin install seneca@seneca
```

Ask in plain words: *"/seneca I have a board update Friday. Here are the numbers."*

Share the files. Recipients don't need Claude or any special software.

The pilot

Bring one real upcoming communication, like a meeting, rollout, or launch. We'll build its whole package with Seneca, together, and you keep everything we make.
